ETAN, THE COMPANY

Etan was founded in 1988 and, over the years, has grown into one of the larger players on the European market. The company is a specialist in the high-quality trampoline market and its extensive experience and professional knowledge guarantee the best service.

For every target group, there is a wide range of trampolines available, including accessories, so you are assured of a product that meets all of your wishes. It is important to have a good mix of safety, jumping fun, quality, and price. That is why Etan delivers only quality for all our product lines. Your Etan partner will be happy to assist you.

ETAN, THE VISION

We say “no” to mass production and want to do our bit for society. We make sure that children can play safely on our trampolines.

Nowadays, quality is no longer taken for granted, which is why we check every aspect of our product ourselves. We respect our customers and the environment. That is why we make safe products from durable materials. By doing this in our own production facility in the heart of Europe, Bosnia and Herzegovina, we produce durable trampolines that provide years of outdoor fun. In addition, we promote economic equality and help the less fortunate in Bosnian society.

ETAN TRAMPOLINES

What is the big attraction of trampolining? The answer is very simple: trampolining is healthy, cool and lots of fun! The feeling of being weightless for a while. Always a bit higher, always better tricks.

Etan trampolines are designed in the Netherlands and made in Etan's own factory in Bosnia and Herzegovina. Here, production takes place with an eye on safety, only European materials are used, and we strive for superior quality. Quality from Europe!

But which trampoline is right for you? Do you opt for standing, in-ground or ground-level? One thing is certain! If you choose Etan, you choose years of fun!

ETAN PREMIUM

With an Etan Premium trampoline, you can count on quality, safety, and lots of fun in the garden! The Etan Premium line is produced in our own factory in Bosnia and Herzegovina, with high-quality and durable materials, all imported from European countries.

The Etan Premium line contains the unique Diamond System. There is alternately a triangle with a round hole and a triangle with an oval hole attached to the jumping mat. Because of this, not all springs are activated at the same time during jumping.

For small jumpers, this means that they can still jump smoothly with less weight. In combination with the high-quality conical springs from the Netherlands, where zinc is processed into the steel of the springs, the jumping power is optimal.

With an Etan Premium trampoline, you're assured of a safe trampoline that will remain safe, strong and popular for years to come.

WHY ETAN PREMIUM

Jumping mat

The jumping mat of the Etan Premium is made of high quality Permatron and is equipped with Etan's unique Diamond System. A frost and rust resistant triangle to which the spring is attached. Jumping has never been this smooth.

Extra flap

All Etan Premium jumping mats have an extra flap. This flap is placed over the springs, covers them, and prevents accidents.

Springs

Conical steel springs of Dutch origin for a powerful and smooth jump. With zinc processed into the steel for optimal corrosion resistance. Strength through the years!

Ladder

The included trampoline ladder ensures that you can easily get onto the trampoline.

Safety net

An externally attached safety net for optimal safety while jumping. Tested up to 500kg. Available in standard and deluxe version where the poles are bent. Safety first!

Curved poles

The slightly curved shape of the deluxe safety net poles of Etan Premium trampolines provides a deeper shock absorption. The thicker foam also ensures the jumper's safety!

Innersleeve

An innersleeve on the inside of the trampoline safety pad. In this way, the safety pad lays well on the jumping mat. This prevents the jumper from reaching the springs.

Safety pad

The safety pads of Etan Premium trampolines are made of high-quality European PVC, UV-resistant material and come with a 5-year guarantee.

Frame

The frame is made of 1.8 mm thick, rust-resistant Italian steel. With this base, you will enjoy years of jumping fun.

ETAN PREMIUM

The Etan Premium trampoline with safety net in the round version. This is a trampoline as you saw it years ago. The difference? With an Etan Premium, you get a real quality trampoline with a modern design.

Are you going for upright, in-ground or PremiumFlat? At Etan Trampolines, we have every model in green, grey and black.

Type	Size	Max kg	Width/ thickness safety pad
EPG08C(D)	Ø244 cm	50kg	380 x 30 mm

ETAN PREMIUM

IN-GROUND

The Etan Premium in-ground trampoline with safety net. This trampoline is meant to be in-ground and is placed on the edge of the pit.

The advantage of an in-ground trampoline is that it completely disappears in your garden because it's lower to the ground. The eye wants something too!

ETAN PREMIUM

RECTANGULAR

The Etan Premium trampoline with safety net in rectangular version. Extremely popular because of its rectangular shape. So, this trampoline fits in every garden!

All Etan Premium trampolines with safety net are available as standard and deluxe models. What's the difference? In the deluxe version, the poles of the safety net are curved, have thicker foam, and have a deeper shock absorption.

Type	Size	Max kg	Width/ thickness safety pad
EPG0965C(D)	281 x 201 cm	50kg	380 x 30 mm

Etan Premium Trampoline rectangular with net deluxe 1075ft / 310 x 232 cm black

ETAN PREMIUM

RECTANGULAR IN-GROUND

The Etan Premium trampoline with safety net in the rectangular in-ground version. Extremely popular among the families with a smaller garden. Why? Because it fits everywhere!

Did you know that rectangular trampolines jump just a bit differently than round ones? This is because the springs on the side where you jump stretch just a bit harder than on the other side. This creates a 'launching effect'. Perfect for high jumps and tricks.

Type	Size	Max kg	Width/ thickness safety pad
IEPG0965C(D)	281 x 201 cm	50kg	380 x 30 mm
IEPG1075C(D)	310 x 232 cm	150kg	410 x 30 mm

ETAN'S DIAMOND SYSTEM

Diamond System

Only found on Etan Premium trampolines is the Diamond System. This system replaces the traditional triangle with a frost- and rust- proof plastic triangle.

Next to durability the Diamond System for a smoother jump. This is due to the alternating round and oval openings in the triangle.

The smoother jump is due to the spring in the oval opening being stretched less than that in the round opening. This means that

during jumping, the jumper first has to stretch one half of the spring with the oval opening and a fraction of a second later the other half with the round opening.

Traditional triangle

The traditional iron triangle, the most commonly used type of triangle, is the part to which the spring is hooked in order to secure the trampoline jumping mat to the frame.

These triangles are coated in a bath of zinc for a rustproof layer.

PART IN NEED OF REPLACEMENT?

Is your trampoline a few years old? Are you afraid that the safety pads don't cushion the fall anymore or that the jumping mat tears?

In such cases, it might be wise to look for a replacement product.

At Etan Trampolines, we don't only sell trampolines, but also all parts separately. This way, you can be sure you can always buy a new jumping mat for your trampoline model years later. You never know what can happen when you're trimming the hedge.

Can't find the pad you're looking for on the website or at your local retailer? Then please contact us directly. Often, we have developed a replacement product especially for your trampoline model.

ETAN SKY-FLYER

An Etan Sky-Flyer trampoline is the trampoline for the young and/or starting trampoline jumper. The Sky-Flyer is available as a round in-ground trampoline and is supplied with a trampoline safety net. The internal safety net is attached to the jumping mat so hands and feet cannot reach the trampoline springs. This means that even the smallest jumpers can learn to jump the trampoline safely.

Quality, European production and a good price? You get it all with the Etan Sky-Flyer trampoline! The Sky-Flyer line is produced in our own factory in Bosnia and Herzegovina, from European materials. You won't find a better price-quality trampoline anywhere.

Experience years of fun with the Sky-Flyer!

WHY ETAN SKY-FLYER

Jumping mat

The trampoline jumping mats of all Etan Sky-Flyer trampolines are made of strong Permatron and have iron triangles on which the springs hook. These triangles are dipped in a bath of zinc to make them rustproof.

Springs

The springs of all Etan Sky-Flyer trampolines are processed with zinc for optimal corrosion resistance. These springs are known for their smooth and effortless jump.

Safety net

The safety net of the Etan Sky-Flyer is easily attached to the poles of the frame. The net is tested to 500kg and ensures safe trampoline jumping. Safety is no. 1!

Internally fixed

The safety net of all Etan Sky-Flyers is attached to the inside of the safety pads. In this way, an enclosed space is created, and the springs are fully covered.

Safety pad

Great in this price class! The protective edge of the Etan Sky-Flyer is 20mm thick. The thickness of the foam and the German PVC make the safety pads very safe.

Frame

With a thickness of 1.5mm, the frame of the Etan Sky-Flyer trampoline is incredibly strong. Rustproof and very sturdy!

ETAN SKY-FLYER

IN-GROUND

The Etan Sky-Flyer trampoline is available as a round trampoline in-ground. The trampoline is placed on the pit and is easy to dig in.

This trampoline is characterised by its smooth and effortless jump. Perfect for the younger jumpers among us.

TIME FOR AN UPGRADE?

Are you not jumping high enough anymore? Do you want to jump faster because you want to do tricks or somersaults? Then it's time for something better.

It happens more often than you think that a trampoline jumps great one moment and doesn't jump that well a few years later. Just like with everything, your need for trampoline jumping also changes.

At Etan Trampolines, we developed several upgrades to improve your jumping experience. Do you suffer from a dull jump? Then the airflow is probably not optimal. Then opt for Etan OptiFlow!

Would you like to have a faster jump? This is probably because your springs are not turned up strongly enough. In that case, the Etan QuickSprings springs are the solution for you.

All in all, for every trampoline need, Etan Trampolines is the right address.

Etan Premium

The Etan Premium trampoline jumping mat is made of high-quality permatron. The trampoline springs are attached through Etan's unique Diamond System.

These rust- and frostproof triangles ensure a smooth and controlled jump!

Etan OptiFlow

The Etan OptiFlow trampoline jumping mats are made of PVC. The open structure of the jumping mat allows the air to move through it optimally.

Thanks to the optimal airflow, dull jumps are a thing of the past! Upgrade your trampoline!

Etan Premium springs

The Etan Premium springs come standard with all Etan Premium trampolines.

These springs were especially developed for a smooth jump. Jumping for entire childhood!

Etan QuickSpring springs

The new Etan QuickSpring springs are stretched a lot tighter, compared to the Etan Premium trampoline springs.

This creates a stronger and faster jump. A jump that gives you the chance to make lightning-fast somersaults and screws. Perfect for the real daredevil!

Etan Xchange jumping mat

The Etan Xchange trampoline jumping mats are the perfect replacement mats on the market.

These mats are specially made for trampolines you often can't find replacement mats for.

These are trampolines with 14 and 16,5 cm springs.

Etan Xchange safety pad

The Etan Xchange trampoline safety pads are made of high-quality European PVC.

These safety pads are extra wide. These safety pads are extra wide, so they can be used universally for trampolines of different brands, sizes, and spring lengths.
